## About me

Enthusiastic developer with 1.5 years experience in Front-End development. I'm looking for a remote job.

## Employment

### February 2020 — till now — MTS Digital

#### ***Front-End developer, Coworking Booking System project***

- Front-end technologies in the project: *Angular 12, NGXS, Rxjs, swagger-codegen, chart.js, xlsx.js*. Formatting tools we have and I customized: *husky, eslint, prettier, csscomb*
- Developing new functionality: adding new forms, sections with information, interactive resource editor with svg map and booking functionality.
- Fixing bugs (a lot of small bugs of html layout, wrong passed parameters to api calls, unaccounted cases in the functionality, just bugs in functionality)
- Created design for 9 maps based on floor plans in *Figma*
- Refactoring legacy code: rewrote some old angular components in more readable way, rewrote a lot of rxjs streams with "subscribing inside subscribing" in the correct way
- Making code review and checking code for bugs
- Helping new developers to join the project
- Working in *Agile, Scrum* methodologies.
