About me

An enthusiastic developer with 2 years of experience in Front-End development.
I'm looking for a remote job.

Employment

February 2020 — till now — MTS Digital

Front-End Developer, Coworking Booking System project

- Front-end technologies in the project: *Angular 13, NGXS, Rxjs*, *swagger-codegen, chart.js, xlsx.js.* Formatting tools we have and I customized: *husky, eslint, prettier, csscomb;*
- Developing new functionality: adding new forms, sections with information, interactive resource editor with SVG map and booking functionality;
- Fixing bugs (a lot of small bugs of an HTML layout, wrong passed parameters to API calls, unaccounted cases in the functionality, just bugs in functionality);
- Created design for 9 maps based on floor plans in *Figma;*
- Refactoring legacy code: rewrote some old angular components in a more readable way, rewrote a lot of rxjs streams with "subscribing inside subscribing" in the correct way, used right rxjs operators;
- Made two big optimizations;
- Making code review and checking code for bugs;
- Helping new developers to join the project;
- Working in *Agile, Scrum* methodologies;
- Participated in the assessment of tasks.

Front-End Developer, IOT Cars

- Front-end technologies in the project: *Vue 2 + Composition API, Vuetify.js, Pinia.js;*
- Developed an admin panel;
- Participated in developing a selling landing.

Front-End Developer, Corporate site for MTS.Media

- Front-end technologies in the project: *React hooks;*
- Helped to finish a project developing a page with a complicated animation.

Education

2018 — 2022 - Moscow Polytech, Moscow, Information Technology - Bachelor of Technology - BTech.

Training and Courses

2019 — React.js, KTS Studio;

2019 — JavaScript, "The Complete JavaScript Course 2019: Build Real Projects!", Udemy;

2018 — HTML, CSS - https://htmlacademy.ru.

Skills

Languages: Javascript, Typescript.

Frameworks: Angular 2.

Design tools: Figma.

Formatting tools: eslint, prettier, csscomb.

Tools: git, Github, Gitlab, husky.

Misc: SASS, HTML, CSS, BEM, node.js, SVG, Linux.

Character and Personality

- Great involvement in a project;
- Continuous training and sharing knowledge;
- Initiative - I don't hesitate to suggest functionality that can improve a project.

Interests

- Discussing interesting topics;
- Theater;
- Reading books;
- Trying new hobbies.
